- Under ideal conditions, 2 man-days required per ship

TR01 BATTLEGROUP

SOFTWARE VALIDATION DATA

TO DATE

RECOMMENDATIONS

- **Make Software Validations a part of pre-deployment assessment visit.**
 - REASONS: Ships, equipment, and sailors will be more readily accessible to complete each job in a timely fashion.
- **Make X-RICS for CIWS software.**
 - REASONS: Lots of research necessary just to determine software version in CDMD-OA. You must research the ordalt rics to verify versions.
- **Make equipment functional descriptions standardized for all CDMs.**
 - REASONS: Software efds are confusing and sometimes wrong.

QUESTIONS

- Other records in database meet the DATA GRAB criteria.
 - Should these be included in the prototype?
 - Will there be others in the future?
